

# HIP & RIDGE STRIPS

Hip & Ridge Strips shown in: Natural Wood

**HIP & RIDGE STRIPS 10" (254 mm)**  
**HIP & RIDGE STRIPS 12" (305 mm)**

### EXCEPTIONAL PERFORMANCE

Malarkey Roofing Products' Hip & Ridge Strips 10" (254 mm) and Hip & Ridge Strips 12" (305 mm) respond to the demands of a high performance hip and ridge cap for all shingled roofs, supporting an array of ridge vents.

Providing easy and quick installation, Malarkey Hip & Ridge Strips are manufactured perforated and have a low profile creating a traditional hip and ridge appearance.

### SBS MODIFIED ASPHALT STRIPS

Hip & Ridge Strips are coated with rubberized asphalt to create flexibility, weatherability, and outstanding granule adhesion. The thermo cycling resilience of the SBS asphalt allows the granules to expand and contract as the temperature changes. Rubberized asphalt has the superior ability to match the movement of the granule, holding it in place. The longer the granules adhere to the asphalt, the longer your roof will last.

*\*Malarkey Roofing systems require algae resistant EZ-Ridge™ XT shingles or Hip and Ridge shingles 10" & 12", in conjunction with the algae resistant shingles, to receive the full 20 year algae resistant warranty system. 3M and Scotchgard are trademarks of 3M Company.*

*Hip & Ridge Strips are designed to highlight certain hues in the Malarkey shingles and may not always appear to be an exact match to the entire blend of the roof.*

### 3M SCOTCHGARD™

10" (254 mm) and 12" (305 mm) Hip & Ridge Strips feature a Scotchgard™ Algae Resistant Roofing System from 3M with a 20 year warranty, when used in conjunction with one of Malarkey's Scotchgard™ shingles. The Scotchgard™ Algae Resistant Roofing System from 3M is the single most effective solution available against algae damage.

### 3M ROOFING GRANULES AND COLORFAST COATING

Hip & Ridge Strips use 3M granules, which are the standard of quality and performance for the roofing industry and provide the highest degree of ultraviolet protection available, to ensure a lasting roof system.

3M specially selected granules are coated with long lasting colored ceramic to guarantee your roof will provide many years of color without fading.
